## Ladder Climb

### ATTENDANTS READ HERE:

1. One adult attendant must supervise the unit. Do not leave the unit unattended at any time.
2. The attendant must read and understand the safety instructions and they are responsible to make all riders aware of the safety rules. Safety of the riders is the responsibility of the attendant.
3. Deflate immediately if high wind, rain, lightning, or thunder is present or approaching.
4. The inflatable must be securely staked at all times. Keep people away from the wench on the back of the unit.
5. Only 1 at a time on the inflatable. Riders wait outside the unit for their turn.
6. Weight limit per person is 150 lbs. Group children according to age, size, and abilities. No infants allowed.
7. The attendant can stabilize the ladder to allow the climber to get started.
8. **Do not allow the climber to go so high that they are in danger of falling off the unit.**
9. Do not allow anyone to participate who is intoxicated, pregnant, or has any other physical limitations, including neck, back, knee, or other disabilities that may jeopardize their safety.
10. No shoes, silly string, sharp objects, food, gum, confetti, glitter, or pets allowed.
11. No flips or jumping on the inflatable. Don't climb on the inside or outside of the inflatable.
12. Do not allow the inflatable or motor to get wet. Keep people away from the blower and extension cords.

### TO ASSEMBLE THE GAME:

1. The inflatable is heavy and will take 2 strong men to set up the unit. Use caution when lifting.
2. Dimensions are approximately 9'W X 18'L X 9'1"H. Allow 5' clearance on all sides, including the top.
3. Pick a flat, level location free from overhead obstacles like electrical lines or trees, and also away from the vicinity of underground utilities or irrigation.
4. The location must be less than 50 feet from a 20 amp dedicated circuit.
5. Grass is the best surface. The inflatable must be securely anchored at all times.
6. Do not inflate the unit if high wind or rain is present. Watch for severe weather approaching.
7. Place a rug or other protective cover over a hard floor before assembling the framework.
8. Assemble the 4 piece metal stand. Place the inflatable on top of the metal framework.
9. Unroll the vinyl roll and locate the blower tubes extending from the unit.
10. Tie one tube securely around the blower. Make sure there are no kinks in the tube.
11. Tie off the other tube and make sure all zippers are closed under the Velcro flaps.
12. Plug the blower into a GFI outlet and allow the unit to inflate. Do not plug anything else into the same circuit or it will trip the breaker. (If a generator is used, it must be at least 4000 Watts)
13. Use only the electric cords provided. Do not remove the grounding pin from cord.
14. If the blower is used on a gym floor, place a mat under the blower.
15. Immediately anchor the unit by inserting the stakes completely into the ground at a 90 degree angle straight into the ground.
16. Attach the ladder to the upper and lower metal frame pieces. Use extreme caution when operating the wench to tighten the ladder. Keep the cover over the wench.
17. The blower will run continuously during the event.
18. Do not allow anyone on the unit until it is anchored and supervised by a trained attendant.

**TO TAKE DOWN THE GAME:**

1. Clean all debris from the inflatable. Please inform us if the inflatable is damaged, dirty or wet.
2. Turn off and untie the blower. Allow the inflatable to deflate. Remove the blower and the stakes.
3. Remove the ladder using extreme caution when using the wench.
4. Disassemble the metal framing. Watch for overhead obstacles when loading the metal pieces.
5. "Square up" the inflatable and fold it into thirds. Roll it very tightly and put ties around the roll.
6. Use extreme caution when handling the inflatable. It is heavy and will take 2 strong men to load.
