SEAMLESS FLOORING SYSTEMS FOR ANIMAL CARE

Depending on the species of the occupants, animal facilities may experience floor traffic from claws, talons, hooves, paws, and horse shoes. With this type of use, the flooring in use should be designed to be exceptionally scratch resistant, chemically resistant and able to bear heavy loads.

In addition to ensuring the floor will withstand the challenges presented by nonhuman occupants, it is also important to consider how the flooring will affect the experience of these visitors. Slip resistance is needed, to give animals and humans alike a safer walking surface, but care should be taken to ensure that surfaces are still smooth enough to be comfortable for sensitive paw pads.

**EXTREMELY
DURABLE**

**STAIN
RESISTANT**

**SCRATCH
RESISTANT**

**EASY
CLEANABILITY**

RECOMMENDED SYSTEMS FOR ANIMAL CARE FACILITIES

ZILLA-FLAKE

DECORATIVE FLAKE SYSTEM

DECORATIVE FLAKE DELIVERS BEAUTIFUL FUNCTIONALITY

- TERRAZZO LOOK AT A FRACTION OF THE PRICE
- ENDLESS DESIGN AND FLAKE COLOR OPTIONS
- DURABLE SCRATCH AND IMPACT RESISTANT COATING
- NON-STAINING AND EASILY CLEANED
- WITHSTANDS HARSH CHEMICALS AND DETERGENTS
- MACRO (1/4") OR MICRO (1/16") FLAKE OPTIONS
- INTEGRAL COVE

RECOMMENDED FOR:

- WAITING AREAS
- KENNEL, HOLDING & GROOMING AREAS
- LOBBY AND BREAKROOMS
